U.S. SOY for a growing world

The U.S. soy industry is a trusted partner, providing its customers with a Total Quality Experience: high performing products delivered by the most reliable, consistent and sustainable soy supply chain in the world.

U.S. soybeans and soybean products are the top choice around the globe. One of the best and most cost-effective sources of vegetable protein, soybeans are a staple of human, animal and fish diets in many parts of the world. Soy is also instrumental in the manufacture of numerous industrial products including biodiesel, carpet, lubricants, plastics and foams, among many others. Soy's versatility makes it, economically, the most important bean in the world.

The U.S. soy family promises a distinct performance advantage, complete delivery confidence, and is a long-term partner in providing high-quality soy to a growing world.
