RFP TITLE: Quality Control in Feed Formulations

RFP CONTACT:

Name: Morgan Cheatham and Kim Liliensiek

Email: mcheatham@ussec.org; kliliensiek@ussec.org

PROPOSAL DEADLINE: January 15, 2025

INTRODUCTION:

It is not common practice for feed companies to continuously monitor the quality of the raw materials they receive and use real time data for precision formulation. They often analyze the quality of individual ingredients and store the information for years at a time. However, it is necessary for feed companies to perform statistical analyses assessing trends in ingredient quality for specific suppliers and origins to optimize their operations and formulations. This project aims to emphasize the importance of ingredient quality analysis by origin and supplier, and the integration of results into feed formulation.

PURPOSE OF RFP:

USSEC's standard practice is to RFP in an open and competitive manner. This type of cost analysis will assist in determining the fair market value for the work to be performed and allows USSEC the opportunity to evaluate various proposals and select the best contractor for the job based on experience, availability, expertise, approach, and cost

BACKGROUND & PURPOSE OF PROJECT:

TARGET AUDIENCE:

The deliverables of this work are meant for use by feed millers, quality control managers, nutritionists and formulators.

SCOPE (SERVICES) OF WORK:

USSEC seeks to collaborate with quality control experts with experience evaluating raw ingredient nutritional quality by origin and utilizing data analytics to produce insights useful to feed producers. Selected contractors will be working also in collaboration with a software company with experience in feed ingredient characterization and quality control technology to demonstrate the results and value quality control brings to animal feed manufacturers. Communication with the target audience in the form of seminars on quality control to

understand specific customer interests will be pivotal to the success of this project. The selected contractor will help USSEC to teach the target audience how to do the analyses and evaluations in their operations and may be tasked with organizing future seminars with identified industry partners to globalize this quality control initiative. Year one of the project will be focused on Türkiye while target geographies of year 2 are to be determined.

DELIVERABLES:

Completion Date	Description of Deliverable
March 2025	Organize a quality control and feed formulation seminar in Türkiye - 2 days -in collaboration with Evonik, Best mix and USSEC experts
Ongoing	One on one customer visits- During the year (2-3 visits 3-4 days each)
Ongoing	Virtual meetings for evaluating the work will be performed and/or performed, progress discussions, next steps etc.

SUPPLEMENTAL INFORMATION AND BACKGROUND

BUILDING A PREFERENCE FOR U.S. SOY

USSEC's strategy can be found here: <http://ussec.org/about-ussec/vision-mission/>

USB's Long Range Strategic Plan can be found here: <http://unitedsoybean.org/about-usb/strategic-planning/>

We are a dynamic partnership of key stakeholders representing soybean producers, commodity shippers, merchandisers, allied agribusiness and agricultural organizations.

Through a global network of international offices and strong support in the U.S., we help build a preference for U.S. soybeans and soybean products, advocate for the use of soy in feed, aquaculture and human consumption, promote the benefits of soy use through education and connect industry leaders through a robust membership program.

Our 15-member board of directors is comprised of four members from the American Soybean Association (ASA), four members from the United Soybean Board (USB), and seven members representing trade, allied industry, and state organizations.

New board members are seated annually. We are receiving funding from a variety of sources including soy producer checkoff dollars invested by the USB and various state soybean councils; cooperating industry; and the American Soybean Association's investment of cost-share funding provided by the United States Department of Agriculture's (USDA) Foreign Agriculture Service.

The United Soybean Board, created by the 1990 Farm Bill to manage and direct the National Soybean Checkoff, is dedicated to marketing and research for the soybean industry. USB is comprised of 73 volunteer soybean farmers representing the interests of fellow growers nationwide. Each board member is nominated by Qualified State Soybean Boards (QSSBs) and appointed by the U.S. Secretary of Agriculture.

Because of the limitations on administrative and salary costs established in the Act, USB outsources the majority of its program management responsibilities to USB's three primary contractors:

- SmithBucklin-St. Louis for domestic marketing, new uses, production research and Board initiative activities;
- Osborn & Barr Communications for communications/public relations activities and;
- U.S. Soybean Export Council (USSEC), Inc. for international marketing and global opportunities activities.

As one of these three primary contractors USSEC may also undertake initiative activities on behalf of USB. USB considers primary contractor staff (approximately 60 people) as core USB staff. These three primary contractors use a number of subcontractors and, together, these entities carry out approximately 450 projects each year for USB. USB also manages approximately 10 subcontractors.
